INTRODUCCIÓN

El Monitor Educativo, cuya quinta edición se presenta este año, es una herramienta que procura aportar elementos que faciliten el acceso de distintos actores a información sistematizada sobre la educación primaria pública en Uruguay. Para ello se nutre de variadas fuentes que permiten la producción de informes sobre distintas unidades de análisis. De esta forma, a través del Monitor se difunden resultados específicos de cada escuela, departamento, contexto sociocultural, categoría así como del sistema en su conjunto. Ellos se canalizan a través de varios documentos: *Informe Individual* a las escuelas públicas urbanas y rurales de todo el país; *Comunicación de Resultados*, que informa sobre datos agregados a nivel nacional; *Informe para la Inspección Departamental o Nacional* de la posición relativa de la inspección en un conjunto seleccionado de indicadores; y un informe nacional llamado *Estado de Situación*, que resume a nivel general, por contexto sociocultural, área urbana o rural y por categoría de escuela las principales tendencias de evolución de los indicadores que se monitorean año tras año. Toda esta información se encuentra organizada en una herramienta interactiva de consulta que se distribuye a través de un disco compacto.

Las principales dimensiones de análisis sobre las cuales se brindan indicadores en este informe son aquellas que dan cuenta de los procesos y resultados de los alumnos, de los recursos con que cuentan las escuelas de cada inspección, tanto materiales como humanos, y de los contextos sociales donde se insertan. Este sistema de indicadores aspira a contribuir a la labor de los directores, inspectores y autoridades nacionales en el seguimiento de la realidad educativa de las escuelas públicas año tras año.

Vale destacar que esta edición del Monitor Educativo presenta por primera vez un Informe Individual para cada escuela rural del país, con lo cual para el año 2006 se realizan 2.067 informes individuales (921 y 1.146 para escuelas urbanas y rurales respectivamente). Asimismo, la información en términos agregados para las escuelas rurales se incorpora al Informe para Inspecciones Nacionales y al CD del Monitor.

Este cuadro presenta:

- Para cada categoría, el porcentaje de madres (o padres) que completaron no más que sexto grado de escuela. Este dato surge del relevamiento de Contexto Sociocultural del año 2005.
- En las siguientes tres columnas, el porcentaje de niños matriculados en escuelas de contexto medio y favorable, contexto desfavorable y aquellas de contexto muy desfavorable.
- En las últimas dos columnas se presenta: un indicador de pobreza, medido a través de la existencia de al menos una necesidad básica insatisfecha en el hogar (donde las dimensiones consideradas son Hacinamiento, Acceso a agua potable, Servicio sanitario o Materiales de la vivienda) y otro de integración social, que surge de considerar la asistencia al sistema educativo de todos los niños del hogar en edad escolar.

CUADRO 9

- Este cuadro presenta el tamaño medio del grupo (cantidad de niños sobre cantidad de grupos) para la totalidad de las escuelas urbanas. Los datos corresponden a la matrícula inicial.
- También describe una serie de indicadores concernientes a la experiencia y antigüedad docentes. La experiencia refiere a los años de ejercicio de la profesión por parte del docente. Por otra parte, la antigüedad se limita a la cantidad de años de ese ejercicio en el establecimiento relevado. Con las categorías 3 y 4 años de antigüedad suma el 100% de los casos.
- En el caso del indicador "Presencia de maestros de apoyo", el porcentaje se calcula sobre las escuelas con más de 200 alumnos, por entender que la dotación de este tipo de recursos humanos es particularmente significativa en escuelas de mayor tamaño.

CUADRO 10

Total	24,6	51,0	30,9	80,1	61,6

- Al igual que en el caso de los docentes, bajo el título "Porcentaje de directores con", este cuadro aporta información sobre la antigüedad en el cargo de los directores. Una vez más se debe tener en cuenta que los años de antigüedad evidencian el tiempo en que el director se viene desempeñando en dicha tarea.
- Debajo de "Porcentaje de escuelas", el dato de único director en los últimos cinco años es un indicador de la rotación registrada en las escuelas de cada inspección (cuanto mayor es el porcentaje en esa columna, menor es la rotación de directores en escuelas de esa inspección).
- Al considerar la presencia de subdirector y maestro adscripto, una vez más se consideran las escuelas en las cuales la provisión de estos recursos adquiere mayor relevancia, es decir, las de mayor tamaño (en este caso se consideran aquellas con más de 200 alumnos).
- En la última columna de la derecha del cuadro se presenta el porcentaje de escuelas con computadoras de uso administrativo respecto al total de establecimientos del país.

Este cuadro presenta información sobre:

- Datos de equipamiento didáctico de las escuelas de cada categoría a través de indicadores de disponibilidad de recursos didácticos (biblioteca y computadoras).
- La evaluación de los directores acerca de la presencia de problemas de infraestructura en distintas áreas.
- En la penúltima columna se presenta la cantidad de escuelas que sobrepasan los 35 alumnos. La cantidad de alumnos en cada grupo surge de los datos de la matrícula de abril del año 2006.
- En la última se hace lo mismo para las escuelas que, estando en esta situación, no tendrían (de acuerdo a la percepción del director) dificultades locativas o grandes requerimientos de inversión para albergar un nuevo grupo. Concretamente se trata de aquellas escuelas donde a la pregunta "¿Si se creara un nuevo grupo, existe espacio locativo en la escuela para albergarlo?" el director contestó "Sí, sin problemas" o "Sí, pero habría que adaptar el salón para ese uso (sin grandes inversiones)".

CUADRO 12
Indicadores de bienestar y capacidad asistencial. Año 2006.

Categoría	Porcentaje de escuelas:					Porcentaje de directores que declaran que el espacio del comedor es un problema

- El presente cuadro aporta información sobre la cobertura de la red asistencial que se extiende a través de las escuelas del país. Toma en cuenta el total de escuelas, pero también presenta el estado de situación en aquellas escuelas cuyo contexto es más desfavorable (en la tercera columna, % de escuelas de contexto desfavorable y muy desfavorable con comedor).
- Al mismo tiempo informa sobre cuáles son las capacidades edilicias y de recursos humanos vinculadas a la provisión asistencial en las escuelas (presencia de profesionales especializados y la evaluación del director del espacio físico del comedor).
- En el caso de la evaluación del director, el porcentaje de respuestas se calcula sobre los directores de escuela que cuentan con comedor.

- Las restantes tres columnas ponen de manifiesto la percepción de los directores acerca de tres problemáticas concretas en el entorno de sus escuelas. Cada una de ellas presenta el porcentaje de directores que respondieron "Muy problemática" a la pregunta: ¿Cuán problemática diría usted que es la situación del entorno de la escuela en los siguientes aspectos? (Drogadicción, alcoholismo, etc.; Delincuencia, vandalismo, violencia; Niños en la calle, niños trabajando, niños pidiendo).

Este cuadro presenta información relacionada con resultados educativos y asistencia de los niños:

- Las primeras tres columnas contienen indicadores de repetición en primer año. Mientras que en la columna uno se trata de la repetición de todas las escuelas, en la segunda y en la tercera se compara la repetición de aquellas de contexto sociocultural muy desfavorable con las de contexto favorable y muy favorable. Estos datos surgen del registro anual que realiza el Departamento de Estadística Educativa del CEP.
- La cuarta columna contiene la repetición total, es decir, de primero a sexto año.
- Las tres últimas columnas brindan información sobre los días asistidos por el niño durante el año. La Asistencia Insuficiente es el porcentaje de alumnos que asistió más de 70 días, pero menos de 140, lo que se toma como indicador del riesgo de repetición por inasistencia. Mientras tanto, el Abandono Intermitente es el porcentaje de alumnos que asistió hasta 70 días en el año y se toma como indicador de riesgo de abandono.

SEGUNDA PARTE
INDICADORES SELECCIONADOS POR ESCUELA.
(Año 2006 y serie temporal 2000 – 2006)

A continuación se presenta información desagregada para cada una de las escuelas que integran la inspección. Los indicadores seleccionados son los siguientes: matrícula de la escuela (1° a 6°), tamaño medio del grupo, repetición en primer año, repetición de primero a sexto, asistencia insuficiente y abandono intermitente. Para cada uno de estos indicadores valen las precisiones ya formuladas en cuanto a su definición y forma de medición, así como las consideraciones más generales planteadas con anterioridad.

El primer cuadro presenta indicadores seleccionados por escuela para el año 2006. Los restantes cuadros consideran cada uno de estos indicadores para cada escuela en una serie temporal que va de 2000 a 2006. Las tablas correspondientes a las series temporales facilitan diversas comparaciones:

- **La evolución de las escuelas:** comparar a cada escuela consigo misma para cada una de las variables incluidas en la serie histórica. Así, será posible, por ejemplo, conocer cuál fue la variación para todo el período, esto es, entre el comienzo de la serie (2000) y la medición más reciente (2006), o cuál ha sido la evolución año tras año intentando identificar si existe un patrón de comportamiento en determinada variable.
- **La comparación entre escuelas:** para cada año y para el período es posible realizar una comparación de estos indicadores entre las escuelas de la inspección. De esta manera, puede apreciarse la posición de diferentes escuelas en cada año así como comparar patrones de evolución entre éstas.

Respecto a la asistencia insuficiente, cabe señalar que debido a que la cantidad de días efectivos en los que se dictaron cursos varía año tras año la comparación entre distintos años no arrojaría conclusiones claras. No obstante ello, permanece intacta la validez de la comparación del porcentaje de asistencia insuficiente entre escuelas para un mismo año.

Finalmente, debe tenerse en cuenta que los indicadores para las escuelas rurales presentan oscilaciones muy notorias. Esto se debe a que muchas de estas escuelas tienen una matrícula muy reducida, lo que hace necesaria una extrema precaución en la lectura de los porcentajes.
